

CRS Accessories have designed a group of products for high end covert security operation. The flexibility of these products enables the end user multiple applications.

For BASIC SURVEILLANCE people use the **CRS-2WLAT** (2 wire long acoustic airtube). This is now no longer seen as covert as everyone is familiar with the "James Bond" look.

NEW COVERT OPTIONS

One new product is the **Q2/MP3 adaptor** that fits onto our earpiece harness series (1 wire, 2 wire and WPTT). The adaptor allows you to plug in your iPod/MP3/MP4 earphone/headsets giving you the appearance of listening to your MP3 player or phone when in fact you are in contact via the 2way radio to your colleagues.

Our **Wireless PTT** solutions provide even greater flexibility by allowing the user to be hands free as the Wireless PTT button (transmitter) can be hidden in your pocket, secured to forward pistol grip or to the steering wheel of a vehicle. There is a second PTT backup button located on the receiver.

1

COVERT SURVEILLANCE OPTION 1

Combine a **CRS-2WH** (2wire harness with inline PTT/Mic) with a **CRS-Q2/MP3** (iPod/MP3 adaptor) and add on your own iPod/MP3/MP4 earpiece/headsets allowing you to just blend into the crowd.

2

COVERT SURVEILLANCE OPTION 2

Combine a **CRS-2WHWPTT** (2wire harness with wireless PTT button and microphone) with a **CRS-Q2/MP3** (iPod/MP3 adaptor) and add on your own iPod/MP3/MP4 earpiece/headsets. The microphone is discrete and the wireless **PTT button** can be hidden in a pocket, palm of your hand, Velcro to your finger, wherever. The wireless PTT button is waterproof and will last approximately 2 years before needing to be replaced.

CRS-2WLATWPTT

The Wireless PTT Surveillance kit is like the 3 wire surveillance kit but without the extra cable.

This new innovation allows the user to be hands free as the Wireless PTT button (transmitter) can be hidden in your pocket, secured to forward pistol grip or secured to the steering wheel of a vehicle, wherever practical.

The Wireless PTT (transmitter) is IP67 rated and completely water proof.

There is no charging of batteries as this product has been designed to be pressed 300,000 times (approximately 2 years) before the Wireless PTT button needs replacing. If the Wireless PTT button does fail there is a second PTT backup button located on the receiver.

IDEAL for:

- **Covert operations** – undercover police/customs/AFP accompany with the earbud to look like an iPod/MP3.
- **Plain clothes protection officers** who require discrete communications when they are providing protection for VIPs.
- **Anybody who uses a Portable radio** can secure the Wireless PTT to the steering wheel/pistol grip for hands free.
- **Security.**

- Variety of earpiece options (e.g. earhook, acoustic airtube, dhook, earbud, etc).
- Working frequency is 915MHz.
- Discrete microphone.
- IP67 waterproof wireless PTT button.

Various ways to use WPTT Button
